

Test Bench

We produce water meter checkout platform detecting devices and all kinds of flow devices, for water meter sizes of diameter from 15mm to 400mm. The products are made according to the National regulations of measurement No. JJG162-85 and JJG168-88. The accuracy of these devices is $\pm 0.2\%$. The products are made of copper and stainless steel, with features of high precision, long life, easy operation, convenient repairing, reasonable frame, reliable, safe and so on.

We produce full range of devices used in measuring department, water meter factory, water supply company, large or medium size industrial and mining enterprises or water meter maintenance company.
